

Underwriting Referral & Risk Assessment

Standard Operating Procedure — Aegis Insurance Underwriting

Document Reference	SOP-INS-016 · Version 3.0
Process Owner	Underwriting — Risk & Pricing
Effective Date	01 April 2026
Approved By	Chief Underwriting Officer
Classification	Internal Use Only — Underwriting Restricted

1. Purpose

This SOP defines how applications referred out of automated (straight-through) underwriting are assessed, priced, and decided. It ensures consistent risk assessment, correct use of underwriting authority, appropriate reinsurance referral, and clear communication of terms.

2. Scope

Applies to new-business and alteration applications referred by the Automated Underwriting Engine or by a producer because they exceed delegated limits or fail a referral rule. Straightforward auto-accept cases and claims are out of scope.

3. Definitions

- **Referral** — an application that cannot be auto-decided and is routed to an underwriter.
- **Underwriting mandate** — the sum-assured and risk limits within which an underwriter may decide.
- **Loading** — an extra premium applied for above-standard risk; **exclusion** removes cover for a stated condition.
- **Facultative reinsurance** — case-by-case reinsurance for risks above the treaty retention.

4. Roles & Responsibilities

Role	Responsibility
Producer / Agent	Submits the application and any additional evidence requested.
Automated Underwriting Engine	Applies STP rules and raises referrals.
Underwriter	Assesses standard and complex referrals within mandate.
Senior / Chief Underwriter	Decides large cases and approves non-standard terms.
Medical Officer	Reviews impaired-life and medical evidence.
Reinsurer	Provides facultative terms above retention.

5. Procedure

Phase 1 — Referral intake & triage

Step	Activity	Responsible	Timing
------	----------	-------------	--------

1	Application fails an STP rule and is referred; logged in the UW Workbench.	Engine / Underwriter	T+0
2	Check completeness of forms, medical, and financial evidence.	Underwriter	T+1 day
3	Triage by sum assured and risk into standard, complex, or large-case.	Underwriter	T+1 day
4	Confirm the case falls within the underwriter's mandate; else escalate.	Underwriter	T+1 day

Phase 2 — Risk assessment

Step	Activity	Responsible	Timing
5	Assess medical evidence; refer impaired lives to the Medical Officer.	Underwriter / Medical Officer	T+3 days
6	Perform financial underwriting (income / net-worth justification).	Underwriter	T+4 days
7	Evaluate occupation, avocation, and lifestyle risk factors.	Underwriter	T+4 days
8	Request additional evidence (APS, paramedical) where required.	Underwriter	T+6 days

Decision: Does the sum assured exceed the treaty retention of SGD 1,500,000? → *Yes*: refer for facultative reinsurance terms. → *No*: proceed to decision.

Phase 3 — Decision & communication

Step	Activity	Responsible	Timing
9	Determine terms: standard, loaded, excluded, postponed, or declined.	Per matrix	T+7 days
10	Price per the rating tables and document the rationale.	Underwriter	T+7 days
11	Communicate the decision/counter-offer to the producer and applicant.	Underwriter	T+8 days
12	Update PAS; issue the policy or record the decline.	Underwriter	T+9 days

6. Approval / Authority Matrix

Sum assured	Approver	Secondary
Up to SGD 500,000	Underwriter	—
SGD 500,001 – 1,500,000	Senior Underwriter	Underwriter recommendation
SGD 1,500,001 – 5,000,000	Chief Underwriting Officer	Reinsurer (facultative)
Above SGD 5,000,000	Chief Underwriting Officer	Facultative placement + Actuarial

7. Service Levels

- Acknowledge a referral within **1 business day**.
- Standard decision within **5 business days**; complex within **10 business days**.
- Facultative cases per the reinsurer's response time.

8. Systems & References

Systems: Automated Underwriting Engine, UW Workbench, PAS, Reinsurance system, Medical Evidence Portal.

References: Underwriting Manual, Reinsurance Treaty, Medical Underwriting Guidelines.

9. Revision History

Version	Date	Summary
2.5	01 Jul 2025	Added financial-underwriting step.
3.0	01 Apr 2026	Updated retention limit and authority matrix.
